Abstract of JP 2002322045 (A)

PROBLEM TO BE SOLVED: To obtain a care composition for personal use suitable for a skin/care use. SOLUTION: This care composition for personal use including at least one kind of ester and a water dispersible ingredient can effectively supply and/or adhere various beneficial substances in and/or the skin, and since the composition is low in irritation, it is suitably used for people having high-sensitivity in skin or eye.
